- **MEDICAL RECORD TECH**
- **MEDICAL X RAY TECH**

Paramedical courses are medical training courses that are job oriented. Paramedical courses are quite training specific and train the students for real- life medical situations. The significance of paramedical courses has been realized by the increasing need for skilled paramedics in the medical field. This is important to mention that without paramedics the medical field would be crippled.

Paramedics is an amazing field to build a career in the medical field in a short period and budget, unlike the conventional MBBS degree. Paramedical courses are job oriented and present ample employment opportunities.

Another benefit of the Paramedical course is that there are options for postgraduate, graduate, diploma, certificate courses that are of varying durations from 3 years to 4years. One could choose to do a paramedic course at any stage of his/her career even after completion of 10th standard exams. Some courses also give the benefit of no mandatory science stream in 12th.

Engineering Course

A photograph of a desk with various engineering-related items. In the foreground, there are blueprints spread out on a wooden surface, with a pen and a compass resting on them. In the background, a white hard hat is visible, along with a laptop and a small wooden model of a house.

Engineering is a stream of education that involves the application of Science, Technology and Mathematics to innovate, design, develop and maintain machines, structures, software, hardware and systems & processes. This field offers a range of career opportunities across all industries, making it one of the most sought after course pursued by students after 12th class, especially those from the Science stream. Students planning to study Engineering in India & abroad can choose from nearly 100 specialisations, with Computer Science Engineering, Civil Engineering, Electronics Engineering, Electrical Engineering and Mechanical Engineering being some of the most popular ones.

- **POLITICAL SCIENCE**
- **HOME SCIENCE**
- **LIBRARY SCIENCE**
- **SOCIOLOGY**
- **VISUAL ARTS**
- **FOREIGN LANGUAGES**
- **BA GENERAL**
- **BA HEP + CIVIL SERVICE COACHING**

Humanities is one of the major academic disciplines. The field of study teaches students how history, art, music, religion and culture have shaped the modern world. While on one hand, Humanities centres on art, music and literature, on the other hand, Social Sciences focuses on anthropology, archaeology and politics. That is why even though the two streams are different they are often studied together as both complements each other.

A career in Humanities & Social Sciences is not traditionally considered a great career builder. This is because there is a common perception that only students who are academically weak opt for this stream. However, this is far from the truth as there are a lot of career opportunities available for Humanities & Social Sciences students right after graduation. Candidates can take up many courses in the field of Humanities.

Management Course

Management Studies is a course designed to learn the way a company or organisation operates and functions. Management Studies is that branch of education which provides knowledge and training in planning, execution, supervision, and analysis of a business enterprise. Students who want to learn about the establishment of a company or an organisation and its different functional levels enroll into this course. There are about 9,100 Business & Management Studies Colleges in India, of which 78% are private, 15% public/government and 7% public/private. Business & Management Studies can be pursued at different levels including undergraduate (BBA/BMS), post-graduate (MBA/PGDM) and doctoral (FPM).

The eligibility criteria for pursuing a Management Studies course are different at different levels.

Law Course

Law is a career stream that candidates pursue at undergraduate (UG), postgraduate (PG) or doctorate (PhD) level to practice the legal profession in India. Law as a career is very popular among students in India. The popularity of this stream can be judged from the fact that famous people like Mahatma Gandhi, Nelson Mandela as well as the former US President Barack Obama were lawyers. Scope of law as a career is immense in India. These days, law graduates do not just opt to get dressed in black and white apparels and head to court but also make their presence feel in corporate houses, law firms, law agencies, administrative services and the likes. A career in law requires one to put in a lot of hard work and long working hours. The preferred specialisations in law are either criminal or civil. However, these days other branches are also gaining popularity such as cyber law, patent law as well as corporate law. Law Course To make a career in law at the UG level, aspirants can pursue five-year duration integrated LLB courses such as BA LLB, BBA LLB, BSc LLB or BCom LLB. Candidates can also opt to pursue a three year LLB course after completing their graduation. Apart from this, candidates who wish to study further can obtain a master's degree (LLM) followed by a doctoral degree (PhD).

- LLB
- BA LLB
- B.COM LLB
- BVM LLB
- BBA LLB
- LLM
